

First Response Fire Training

Written by Administrator

Friday, 02 July 2010 20:23 - Last Updated Thursday, 11 August 2016 09:16

DESIGNED FOR: Personnel who require knowledge and understanding of extinguishing fires in their workplace.

PRE-REQUISITES: None

DESCRIPTION: In this Unit of Competency trainees demonstrate how various portable fire protection products are used in emergency situations. Product demonstrations include the use of a portable fire extinguisher, a fire hose reel and a fire blanket.

CONTENT: It is essential that competence be demonstrated throughout the duration of the course with the ability of the trainees to understand.

ASSESSMENT: Trainees will be assessed against the learning outcomes using oral questioning, written quiz, and practical use extinguishers and fire blanket on either the BullEx Intelligent training system TM (I.T.S) or BullEx BullsEyeTM Laser Driven System.

- The theory of fire including the Triangle of Combustion.
- The implications of incorrect use of fire extinguishers and hose reels on classes of fire
- How fire can be spread by conduction, convection, radiation and direct burning
- Why cooking oil and fat fires require special attention
- Basic methods of locating a fire
- The meaning of secondary damage
- How water pressure influences the discharge distance for hose reels.

Due to safety and environmental factors, methods of extinguishing Class D and F fires are restricted to oral explanations and role-play/simulations only.

CERTIFICATION: On successful completion of this Unit of Competency trainees will be issued with a Statement of Attainment in PRMPFES05B Use Portable Fire Fighting Equipment. □
